

The PhD Project Reports: Number of Minority Faculty at Top 20 Colleges and Universities Is Growing

Montvale, NJ, June 7, 2005- The PhD Project, a multi-million dollar corporate and academic-led effort to increase minority representation among business professors reports that the number of minority b-school faculty at the top 20 colleges and universities, as ranked by U.S. News and World Report, *is growing steadily*, due in large part to the success of The PhD Project. However, of the estimated 26,000 business school faculty in the U.S., there continues to be significant underrepresentation of African-Americans and Hispanic-Americans, and there are only two Native Americans among the faculty.

Since The PhD Project was founded in 1994, the number of minority professors at U.S. business schools has more than doubled, from 294 to 746. Further, 417 minorities are currently enrolled in doctoral programs, and will take a place at the front of the classroom in the next five years.

Below is a table indicating the number of full time, doctorally qualified minority b-school faculty and minority doctoral students at each of the schools ranked top 20 in the U.S. by U.S. News and World Report.
